

Welcome to Dessintey 1st Summer School!

Program | Pediatric Rehabilitation Workshop

Monday

Tuesday

Let's introduce ourselves!

Everyone takes 30 seconds to:

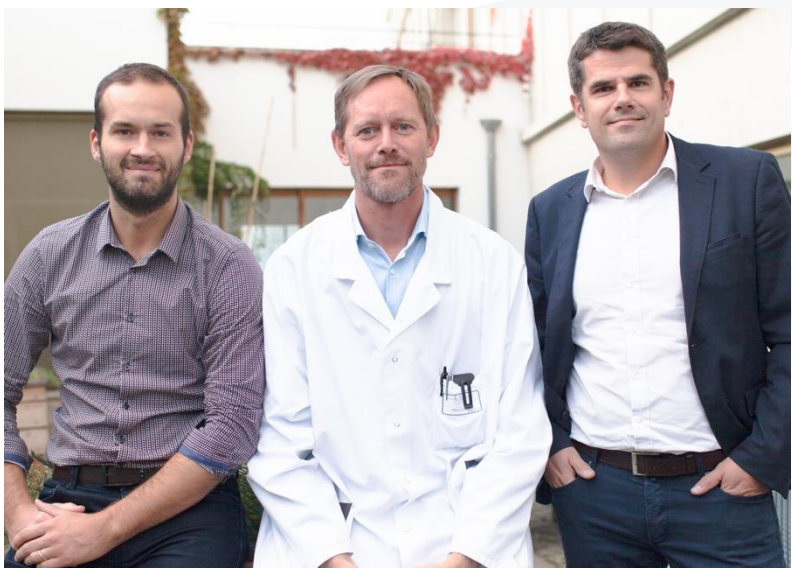

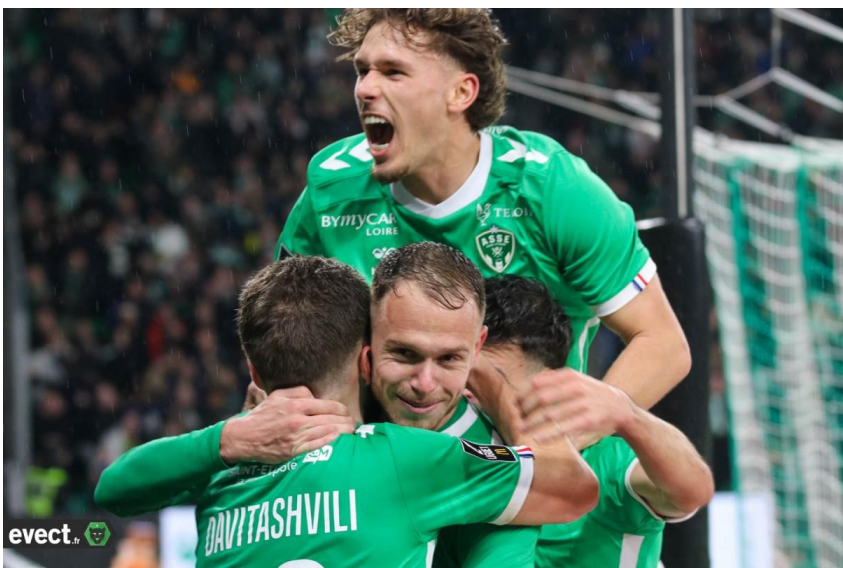

- introduce themselves and explain which hospital or rehabilitation centre they work at,
- what their role is,
- what they hope to gain from this workshop

Dessintey

Who are we?

Dessintey : A legacy of medical innovation

A company that grows and owns its growth

Our mission

Accelerate patient recovery
to ensure greater autonomy

Founded in 2017

Co-founders :

- Nicolas FOURNIER : CEO
- Davy LUNEAU : Product
- Pr. Pascal GIRAUX : Research

- +10M€ turnover in 2025
(+50% growth vs 2024)
- 27 employees
- HQ & Production : St-Etienne (FR)
- Dessintey GmbH : Cologne (DE)
- ISO 13485 Certified

A growing distribution network with a strong reputation

+30 countries covered in EMEA & ASIA
+450 IVS installed throughout the world

Headquarters and production in France

Dessintey GmbH

- Germany

- Austria

- Switzerland

A distinctive therapeutic positioning

Moving Minds, Empowering Bodies

COMPETITION

REHABILITATION
MAINLY FOCUSES
ON MOTOR EXECUTION

DESSINTEY

COGNITIVE
FUNCTIONS

Perception – Memory –

Evidence-based therapy driven

Transforming proven therapies into user-friendly devices for superior patient compliance and results

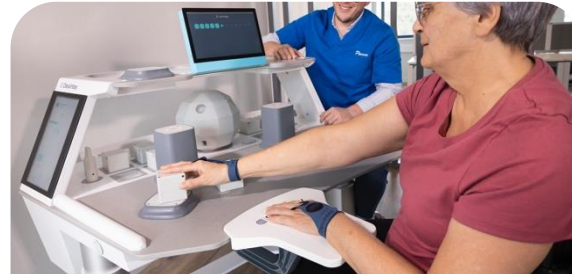

Indications

- Neurology
- Orthopedics
- Geriatrics
- Pediatrics

Mirror Therapy
(MT)

Constraint Induced
Movement Therapy
(CIMT)

Group therapy
Self-Rehabilitation
(SR)

IVS | Intensive Visual
Simulation

- Visual Simulation Training
- Body awareness & action planning
- Proximal and distal training

STIIMP | Implicit Induced
Stimulation

- Strengthen and enhance the use of the pathological limb
- Smart and connected objects
- Intensive uni- and bi-manual activities

SRT Lab | Group Therapy + Self-Rehabilitation

- Group Therapy + Self-Rehabilitation
- Increase patients' dose of activity
- Rich and playful environment with cognitive & motor activities

To be combined in **ARM or GAIT studios** (e.g. FES, robot assisted therapy, etc.)

New devices officially in our portfolio in 2026

NEW

Dual robotic platform
(RAT)

Hunova

(in partnership with Movendo Technology)

- A unique technology for balance and trunk rehabilitation
- A 360° system suitable for all types of patients (neurology, orthopedics, geriatrics, etc.)
- Exercises in sitting and standing positions

NEW

Robotic Assisted Therapy
(RAT)

REAplan®

- Motor execution and performance
- End-effector-type device
- Auto-adaptative upper limb rehabilitation

NEW

HABIT-ILE technic
(Hand and Arm Bimanual Intensive
Training Including Lower Extremity)

REAtouch® / REAtouch Lite 2

- Interactive & playful table
- Intensive motor & cognitive rehabilitation
- Uni-/bimanual activities
- Body awareness and movement control

Our 1st innovation

IVS | Intensive Visual Simulation

A unique lateralized brain stimulation dedicated to movement recovery & chronic pain treatment

- Reinstating coherence between what the patient intends to do and the sensations he perceives promotes motor learning and pain relief
- A new approach to mirror therapy

IVS³ for upper limbs

EU - US Patent
CE FDA Registered

IVS⁴ for lower limbs

EU Patent
CE FDA Registered

A strong customer orientation

We provide more than just a device

- Training and clinical support to therapists
- Ensure an intensive use of the devices
- We offer full support with clinical application specialists to train and guide therapists, ensuring they maximize the use of our rehabilitation solutions.

Scientific Board - Research

Pr. Joël STEIN
NY Presbyterian
Hospital - **US**

Dr. Friedemann MÜLLER
Schön Klinik - **DE**

Dr. Franco MOLteni
Villa Beretta - **IT**

Jens BANSI, PhD
Kliniken Valens - **CH**

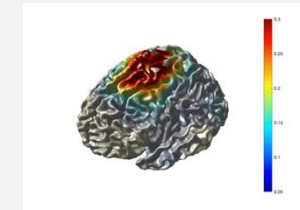

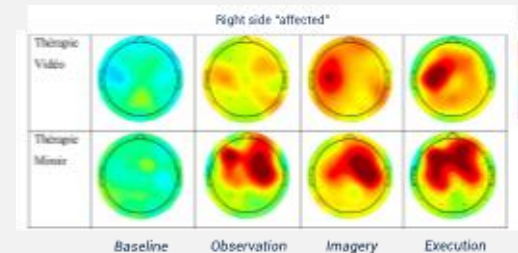

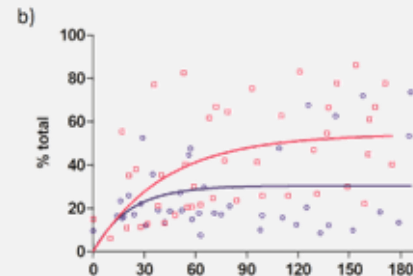

Pr. Pascal GIRAUX
St Etienne Hosp - **FR**

Pr. Michael SAILER
Magdeburg & MEDIAN
Klinik Flechtingen - **DE**

Latest studies outcomes

- Benefit of visual feedback support
- Lateralized cortical activation
- Post movement motor validation
- Clinical improvements
- Replication for lower limb

From startup to industrial company

Always taking care of our ecological footprint

100% Made in France

- ISO 13 485 certified
- Production capacity X2 in 2024
- Working with local suppliers
- Reducing waste packaging

Dessintey contributes in rebuilding Ukraine's critical healthcare infrastructure

- Part of a **€200M initiative supporting Ukraine's reconstruction**
 - **45 Ukrainian hospitals equipped with our IVS3/4 and SRT solutions**
 - Objective: provide new technologies to treat war-wounded civilians and soldiers (phantom limb pain, trauma, etc.)
- ➔ Proud to contribute to this essential mission of resilience and reconstruction.

The Summer School

1st edition

4 weeks

4 sessions

+200 worldwide experts

Why this Summer School?

A knowledge hub in service of patients

We are connected to 30+ countries.

The Summer School is about sharing experiences, creating network of expertise and developing collective intelligence.

- **Bring together best practices:** scientific, clinical, organizational, and funding approaches
- **Grow together with our clients and partners:** a spirit of collaboration in service of patients
- **Meeting in person:** we move faster, understand better, build real relationships
- **4-week format:** presentations + workshops + hands-on interactions
→ not a lecture series

Why pediatrics?

1st edition: a fast-growing segment with specific clinical needs

**More centers are turning to pediatric rehabilitation.
Dessintey is increasingly called upon.**

- Evolving care models require tools and **approaches tailored to pediatric patients**
- Goal: **build an expert network** to advance together on pediatric rehab

Our mindset for these 2 days

Simplicity • Humility • Authenticity • Ambition

We are ambitious, but humble, always close to the clinical reality, always in service of patients.

- A format that reflects who we are: **professional, human, and convivial**
- Workshops, discussions, shared evenings
→ **a collective spirit**
- **Your feedback matters:** this is our first edition, and we are building it with you
- Our exchanges (with your consent) may **feed into shared content and publications**

"At Dessintey, we do not start with technology — we start with patients."

Our mission is to understand the mechanisms of recovery, translate scientific evidence into clinical practice, and support healthcare professionals with the knowledge, methodologies, and tools they need to deliver better outcomes.

Technology is not the purpose; it is simply one of the means we use to advance rehabilitation and unlock every patient's recovery potential.."

Nicolas Fournier
CEO, Dessintey

manukā has learnt to synthesize ideas

- for 10 years as a project manager
- in a plastic industry and in a consulting company

She is now a **graphic facilitator** for 7 years

- Recording ideas in **visual forms**
- During events, meetings and workshops
- Helping attendees **to move thinking further**
